

# MEDILAM

ABSORBING AND ADHESIVE LAMINATES  
FOR HOSPITAL DRAPES

**LIGHT BLUE AND GREEN**

## MEDILAM

Thanks to an effective R&D team and to the accrued experience, Magic developed Medilam. It can be composed by several materials and it is specifically studied to protect the patient and to cover operation theatre area.

Medilam by Magic is in compliance with EN13795 regulation and composed by 2 or more layers laminated through Hot-Melt technology; it is also available adhesivized. The flexibility of the production lines allows Magic to offer different kind of materials as duplex and triplex for basic drapes, reinforcement drapes (with tubular film too) and to study specific structures upon customer's request.

Medilam is available in rolls of widths up to 2000 mm and already cut and folded in sizes from 450x300 to 750x900 mm.

STRUCTURE:

**MICRO-PERFORATED FILM**  
draining layer

**AIRLAID**  
high-absorbing layer

**POLYETHYLENE**  
barrier layer

**NON-WOVEN**  
absorbing or hydrophobic layer

**RELEASE PAPER**  
protection of adhesive

## The benefits

- Small minimum order quantities
- Flexibility and customization
- Availability of folded drapes
